THE PROTIQ MARKETPLACE

FOR CUSTOMERS

Your one-stop shop for
industrial manufacturing

WELCOME TO THE PROTIQ MARKETPLACE

Anyone looking for a manufacturing partner in the industrial environment is faced with the agony of choice: until now, the only way to find the best service provider for one's own requirements was a time-consuming online search in which the range of services had to be compared website by website - not with us.

PROTIQ Marketplace is much more than just another website for industrial manufacturing. We are your holistic online platform that connects you with professional manufacturing suppliers. Whether plastic, metal, ceramic or glass - here you will always find the right partner for your next project.

The fully digitalised ordering process ensures a convenient shopping experience: all functions of the marketplace have been developed based on our many years of experience with industrial customers.

Discover the extensive range of PROTIQ Marketplace now!

WHAT TO EXPECT ON THE PROTIQ MARKETPLACE

A wide range of options: Choose from a wide range of materials and technologies, transparently offered by over 40 professional suppliers.

Quality assurance: We place the highest value on quality. Our partners meet strict standards to provide you with first-class products and services.

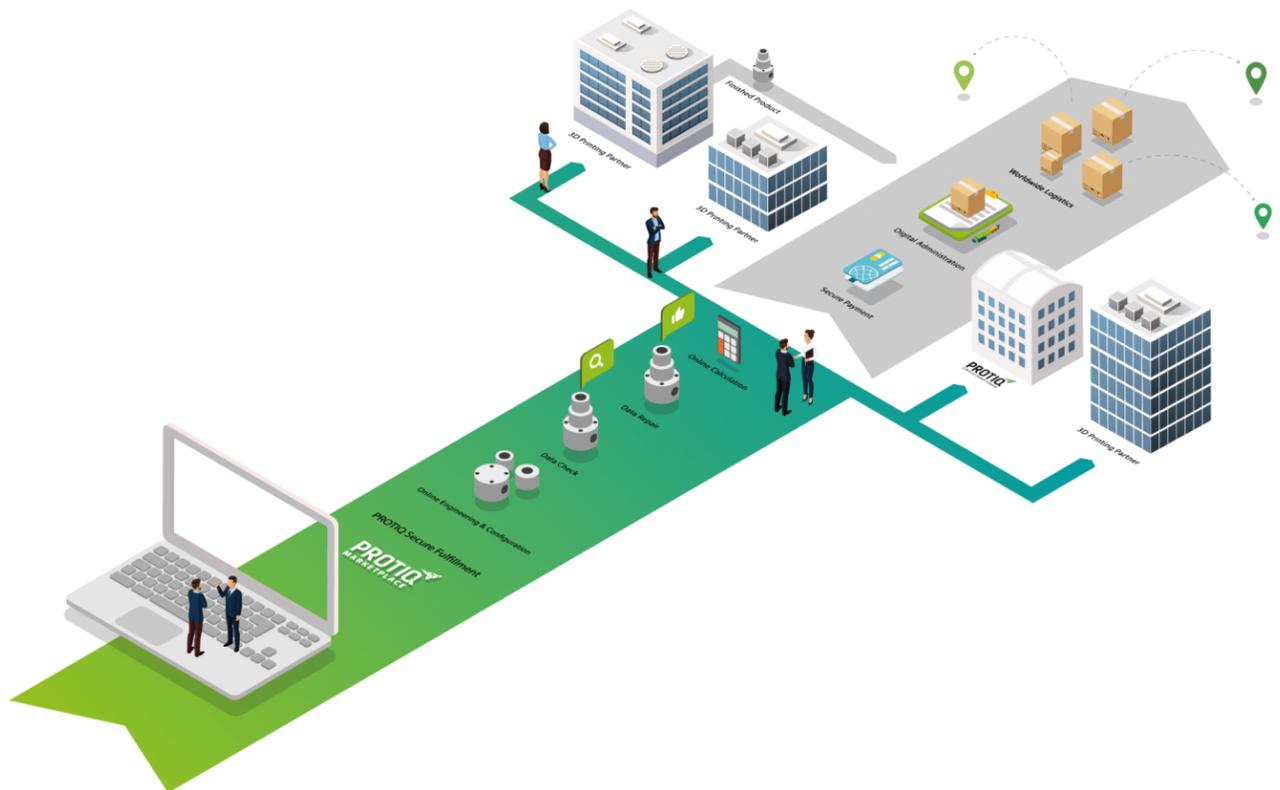

Easy process: From the initial enquiry to the delivery of the final product, our marketplace is designed to make the process as smooth as possible.

Expertise: Take advantage of our providers' many years of experience and in-depth technical know-how for your projects.

OUR PLATFORM AND YOUR ADVANTAGES

Instant price comparison

Know immediately what it costs: After uploading, there is a listing of available suppliers and materials, as well as an exact price calculation.

Data repair

If your 3D model has faulty design elements, it will be repaired automatically after uploading.

Upload assemblies

In the PROTIQ Marketplace, you can upload not only individual 3D models but also entire assemblies together and order them or save them as a project.

Save and share projects

Simply save your shopping baskets as projects to order later or share them with colleagues.

Generate offers

Once you have your configured components in the shopping cart, you can download your official quotation there with one click.

Variety of materials and processes

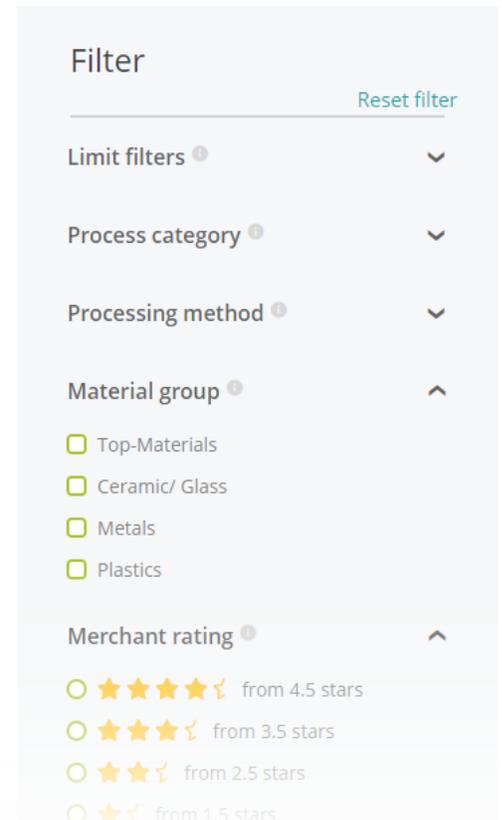

On the PROTIQ Marketplace you will find over 40 specialists with very different materials, processes and competences. So there is a solution for every project.

NEW FEATURES ON THE MARKETPLACE

Filter in configuration process

We actively support you in choosing the right material, process and merchant:

With the new filter functions in the ordering process, you can find exactly the configuration you need for your next project. Your material needs to have a certain conductivity, be particularly flexible or have a specific certification? Then simply set the relevant filters and get exactly the feedback you need - as usual with automatic price information.

PROTIQ Purchase

Our procurement service for business customers:

With PROTIQ Purchase, you benefit from the advantages of the marketplace without having to create each merchant individually as a new supplier. If you decide to use PROTIQ Purchase, you purchase your components via PROTIQ GmbH. Regardless of which merchant manufactures your components, invoicing and delivery are carried out by PROTIQ.

PROTIQ Purchase also guarantees you full price transparency: you can see the extra costs for using the service directly in the ordering process. PROTIQ Purchase can be selected individually for each order and thus offers you support exactly where you need it.

Our new merchant profiles

Find out everything about our merchants in one place:

For some time now, the profiles of our marketplace merchants have been shining in a new light: with a new layout, customer reviews and a clear listing of all the processes and materials offered. In addition, we are gradually adding much more content to show you exactly who you are dealing with here: for example, in the form of photos, news articles or download material.

Instant quotes for milled components

Your individual price in a few seconds:

What you have known for a long time from our additive processes is now also available for machining: From now on, you will also receive your individual offer for CNC-milled components with just a few clicks. The price calculation for your milled components is very simple:

1. Upload your STEP data on our start page
2. Select your component and click on "Material selection"
3. Now go to a machining process and click on "Determine price" for the desired supplier.

After a short confirmation at the top of your browser the price for your component will be calculated and you can put it into your shopping cart as usual.

Merchant ratings

Share your experience with others:

Quality and reliability have always been top priorities on the PROTIQ Marketplace - but of course we can promise you a lot. To make our service even more transparent, we have integrated a new function on the platform in 2022 that promises you the greatest transparency: ratings from our customers. You will find the ratings in the configurator and on the provider profiles. Here, not only the average of all ratings is displayed, but also the number of ratings submitted to enable a better classification.

Even greater variety

The whole world of manufacturing in one place:

In the last few years, the marketplace has become richer with some highly qualified suppliers. This means that we can now also offer you special materials such as glass or silver. You will also no longer find only additive manufacturing processes on our platform, but also CNC machining and various casting processes.

HOW TO ORDER ON THE PROTIQ MARKETPLACE

Data upload: Upload your 3D data directly on our homepage. We process all common file formats. Your file is automatically checked and repaired if necessary.

Configuration: Define the component size and number of pieces, choose the material, process and supplier that best suits your project. You can always compare the price.

Shopping cart: In the shopping cart you have the option to check your order, save it as a project, download a quote - or go directly to the ordering process.

Order: In the order process, you select your desired delivery address, payment method and billing address. After you have sent the order, you will receive a confirmation email - and your components will be manufactured by the selected partner.

The screenshot shows the Protiq Marketplace website interface. At the top, there is a navigation bar with links for 'Private consumer', 'Business customer', 'Search', 'Language EN', 'New Account', 'Login', and 'Cart 0'. Below the navigation bar is the Protiq Marketplace logo and a menu with 'Manufacturing service', 'Other services', 'Knowledge area', 'News', and 'About us'. A green button labeled 'DATEI HOCHLADEN' is visible. The main content area features a large banner with the text 'YOUR MARKETPLACE FOR INDUSTRIAL MANUFACTURING'. Below the banner, there is a green button with an upload icon and the text 'Instant 3D Model Quote'. A message states 'No print file available yet?' with a link to 'View supported formats'. At the bottom, there is a large upload area with a cloud and arrow icon, the text 'Click or drag and drop here to upload 3D Models for Quotation', and a row of checkboxes: 'Upload object in one single part' (unchecked), 'mm' (checked), 'cm' (unchecked), and 'inch' (unchecked).

FURTHER SERVICES ON THE MARKETPLACE

ONLINE TOOLS

On our platform you will find a whole range of configurators with which you can create 3D models for free. Among them, for example, an inductor and a gear configurator.

DATA CREATION

If you do not yet have any 3D data, we can also support you with our construction service. Here we create suitable 3D models based precisely on your requirements.

CONSULTING

You are not sure which material or process suits your next project? Then simply get in touch with us, our team will be happy to help you.

QUALITY ASSURANCE

In addition to production, we also offer quality assurance measures to always deliver the best results. You can add these measures in the ordering process.

PROTIQ PURCHASE

Via PROTIQ Purchase you can order from any supplier on the marketplace - you will always receive the invoice from PROTIQ GmbH.

PROTIQ BUYER PROTECTION

With PROTIQ Buyer Protection, we guarantee our full support for all orders on the marketplace - even if you do not order from PROTIQ itself.

TRAINING COURSES

PROTIQ's experienced team will show you how to integrate 3D printing into your work processes and thus identify and exploit undiscovered potential.

FURTHER INFORMATION

On our website you will find a lot of further information, such as data sheets, process explanations, application examples, supplier profiles and much more.
